

Coltivare Services

“At Coltivare, we bring together farming expertise and data-driven tools to help you get more out of every acre. From tracking costs to planning for the future, our mission is simple: *help farmers grow smarter.*” – Our team promise

Cost Tracking

Keep every dollar accounted for. Coltivare’s cost tracking system makes it simple to record expenses for seed, fertilizer, equipment, and labor.

- Farmers using Coltivare reported **saving up to 12% annually** by identifying hidden costs.
- Our tool lets you track expenses in real time, so you can make adjustments before it’s too late.

Yield Analysis

Turn raw data into real results. Our platform analyzes yields by crop, field, or season.

- Identify patterns that increase yields by an average of **8 bushels per acre**.
- Compare year-to-year results to see what strategies actually work.

Field Mapping

See your farm in a whole new way. With Coltivare’s digital field maps, you’ll have a clearer picture of soil quality, crop health, and resource use.

- Farmers using mapping tools reported **15% better fertilizer efficiency**.
- Color-coded visuals make it easy to plan rotations and manage resources.

Sustainability & Growth Planning

Farming is about today *and* tomorrow. Coltivare works with you to design long-term strategies that protect your soil, conserve resources, and keep profits strong.

- Clients reported **20% lower water usage** after implementing our strategies.
- Our growth plans help farms increase profitability while maintaining sustainability.

Start dreaming up your plans today!
